

Dispense GPs In One Office Visit

SureFit™ is a patent-pending delivery system available exclusively in Paragon HDS®

● 1-Day GP Fitting and Dispensing

SureFit™ is a GP Delivery System available from participating Authorized Paragon Laboratories. SureFit provides practitioners a single-use, 2-to-4 lens fitting and dispensing system designed to ensure a high probability of day 1, first fit success with GPs. The SureFit™ selection of pre-determined and highly predictable lens parameters, offered exclusively in Paragon HDS® material, will simplify fitting, minimize chair time and dramatically improve patient convenience by reducing office visits. Practitioners can order SureFit™ from participating Authorized Paragon Laboratories using corneal and spectacle measurements.

1 DAY
FIT • DISPENSE

● 1-Day GP Fitting Reduces Chair Time

Having a GP patient return for multiple office visits to fit specialty lenses such as multifocals or keratoconus will quickly become a distant memory for GP specialists and occasional GP fitters. SureFit™ enables a practitioner to improve chair time by as much as 75% by successfully fitting a patient on day-1 and, simultaneously, virtually eliminates the costly and time-consuming administration of multiple lens exchanges.

● Improve Revenue and Efficiency

“SureFit™ is on the cutting edge of product fitting philosophy and takes gas permeable fitting to a standardized and simplistic level. With practices forecasting increased profit-per-patient, SureFit™ provides a seamless way to achieve higher profit margins while minimizing chair time. It's clear, as the GP market focuses on specialty modalities like presbyopia and keratoconus, SureFit™ will enable a practitioner to meet the demands of the growing specialty GP market in an extremely efficient manner,” said Joe Sicari, President and CEO of Paragon.
